PROFESSIONAL SUMMARY

Final-year Electronics and Communication Engineering student (CGPA: 8.59) with hands-on internship experience in Python development, ML model building, and end-to-end SDLC execution. Winner of Smart India Hackathon 2025 (Software Edition). Skilled in requirements analysis, system design, test case design, root cause analysis, and delivering scalable, data-driven applications. Strong communicator with a customer-centric mindset and a consistent commitment to code quality and documentation.

EDUCATION

B.E. — Electronics and Communication Engineering

CGPA: 8.59 | Final Year

Chennai, Tamil Nadu • Awarded Best Outgoing Student for academic excellence and overall achievement

TECHNICAL SKILLS

Programming & DB: Python, C, SQL **Web:** HTML, CSS **Tools:** Git, GitHub, Data Visualization, Dashboard Development

ML & AI: Model development, Data preprocessing, Feature engineering, Inference systems, Deep Learning **Core CS:** DSA, OOP, OS, Computer Networks, Problem Solving

Software Dev: SDLC, Agile Methodologies, Requirements Analysis, System Design, Root Cause Analysis, Test Case Design, Code Review, Documentation

EXPERIENCE

Software Developer Intern | Adventure Technology Solutions Pvt Ltd

Jun 2025 – Jul 2025

- Analyzed client requirements and translated them into feasible software designs, actively participating in all SDLC phases from requirement gathering through deployment.
- Developed and optimized machine learning models in Python on real-world datasets, improving predictive accuracy and operational efficiency.
- Designed and executed comprehensive test cases and validation scenarios to ensure error-free, high-quality deliverables.
- Enhanced dashboard performance through optimized data visualization techniques and improved UI components, directly improving usability and serviceability.
- Maintained comprehensive documentation of code specifications, progress reports, and coordinated daily project status with cross-functional teams.
- Reported quality risks and system performance feedback to stakeholders, ensuring timely and accurate delivery.

Network Engineering Intern | Bharat Sanchar Nigam Limited (BSNL)

Jun 2024

- Studied and analyzed telecom network architecture including routing, switching, fault diagnosis, and communication protocols in real-time systems.
- Investigated problem areas within large-scale infrastructure, identifying potential system performance improvement opportunities.
- Documented network data flow and infrastructure performance metrics for formal reporting and knowledge transfer.

PROJECTS

CropNexa 2.3 — AI-Based Farm Assistant | Python · ML · Image Classification · API Integration

- Developed ML-based crop and disease detection system using image classification; implemented full pipeline from data preprocessing and feature engineering to model inference.
- Built offline-capable system integrated with real-time environmental and weather APIs, ensuring reliable performance under low-connectivity constraints.
- Designed multilingual, accessible UI for diverse users; prepared documentation including flowcharts, system diagrams, and code specifications.

Underwater Communication System | Signal Processing · System Design · Performance Optimization

- Designed a hybrid communication model for reliable underwater data transmission in high-attenuation environments using root cause analysis to resolve signal degradation.
- Improved signal stability through system-level optimization; conducted rigorous analysis under noise and environmental constraints to ensure robustness.
- Produced detailed technical reports documenting system behaviour, performance benchmarks, and optimization outcomes.

ACHIEVEMENTS

- Winner — Smart India Hackathon 2025 (Software Edition): delivered a complete software solution demonstrating end-to-end SDLC execution, problem-solving, and team collaboration.
- Finalist — Enviro-Solvers Hackathon conducted by Tamil Nadu Pollution Control Board.
- Top 15 — HCL GUVI 24-Hour Hackathon.
- Best Outgoing Student — awarded for outstanding academic performance and overall excellence.

CERTIFICATIONS

- CISCO CCNA — Networking, Python, Cybersecurity
- Infosys Springboard — Artificial Intelligence Fundamentals
- NPTEL — Machine Learning, Deep Learning, Computer Networks
